

INSTALLATION/PARTS GUIDE

Install Option #1: Metal Standoffs

Best for permanently displaying signs on walls

1

Figure 1

Hold up where you'd like your sign to go. Using a pencil, mark the wall evenly. Twist the top of the metal standoff to reveal the body's barrel. (as shown in Figure #1)

2

Secure the included metal standoffs by adding the necessary pilot holes with your drill. Be mindful when picking your wall location. Use plastic wall anchors afterwards.

MADE IN USA

3

Figure 2

Use a screwdriver to drill the screws into the standoff's hole (found inside barrel) - ensuring surface is flush with the wall.

Parts guide on Figure# 2

4

Place back the standoff's top cover into the front side of the acrylic piece (gently twist and tighten by hand). Double check all sections and make sure all corners of the sign are secure!

Install Option #2: Hook and Chain

Easiest and most preferred option!

Best for temporarily hanging on backdrops, grid panels, or event walls

(Parts guide on Figure# 3)

Insert S-hooks into existing holes

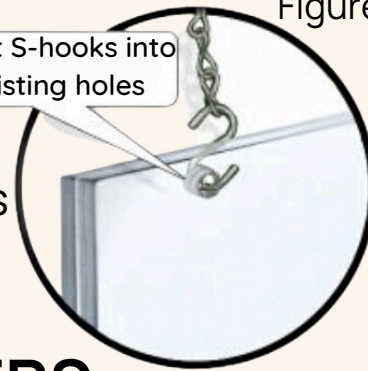

Figure 3

REMINDERS:

1. For USA orders, plug sign into 120V capable outlets
2. Remove brown adhesive backing carefully before use/hanging
3. Keep away from water (unless specifically stated)
4. Be careful when handling- MAY HAVE SHARP EDGES
5. Make sure all connections are fully secure/tightened prior to use
6. Silicone covering on top can come loose. Press down to put back in place
